Fair Value Assessment

Our product governance process requires a review of all products on an least an annual basis to ensure the product continues to offer fair value to Policyholders. Our Fair Value Assessment will include a review of various factors including the product information, product performance, target market, distribution strategy and remuneration.

Our product governance process does not include an assessment of any additional fees incurred as part of its distribution or charges for ancillary products or services, for example premium finance. Our expectation is that additional fees or charges will be in line with Market standards and will not impact the overall value of the product.

Following our latest review, we are satisfied that the product offers fair value to the Target Market, subject to no undue fees or charges as noted above.
